# INTRODUCTION

**The crowdcube** is a UK-based equity crowdfunding platform that enables entrepreneurs to raise capital directly from the public, allowing everyday investors to become shareholders in early-stage and growing businesses. Founded in 2011 by Darren Westlake and Luke Lang, Crowdcube was among the first platforms to democratize investment opportunities traditionally reserved for venture capitalists and angel investors.

The core idea behind Crowdcube is to connect innovative startups and small businesses with a community of investors who are interested in backing ideas they believe in. Through the platform, companies can pitch their business plans, showcase growth potential, and set investment goals. In return, investors can contribute relatively small amounts of money — often as little as £10 — in exchange for equity shares.

# PROJECT OBJECTIVES

## Mission

To democratize investment and make funding more accessible by enabling anyone to invest in the businesses they believe in.

## Vision

This vision is reflected in their commitment to inclusivity, transparency, and community, aiming to bridge the gap between investors

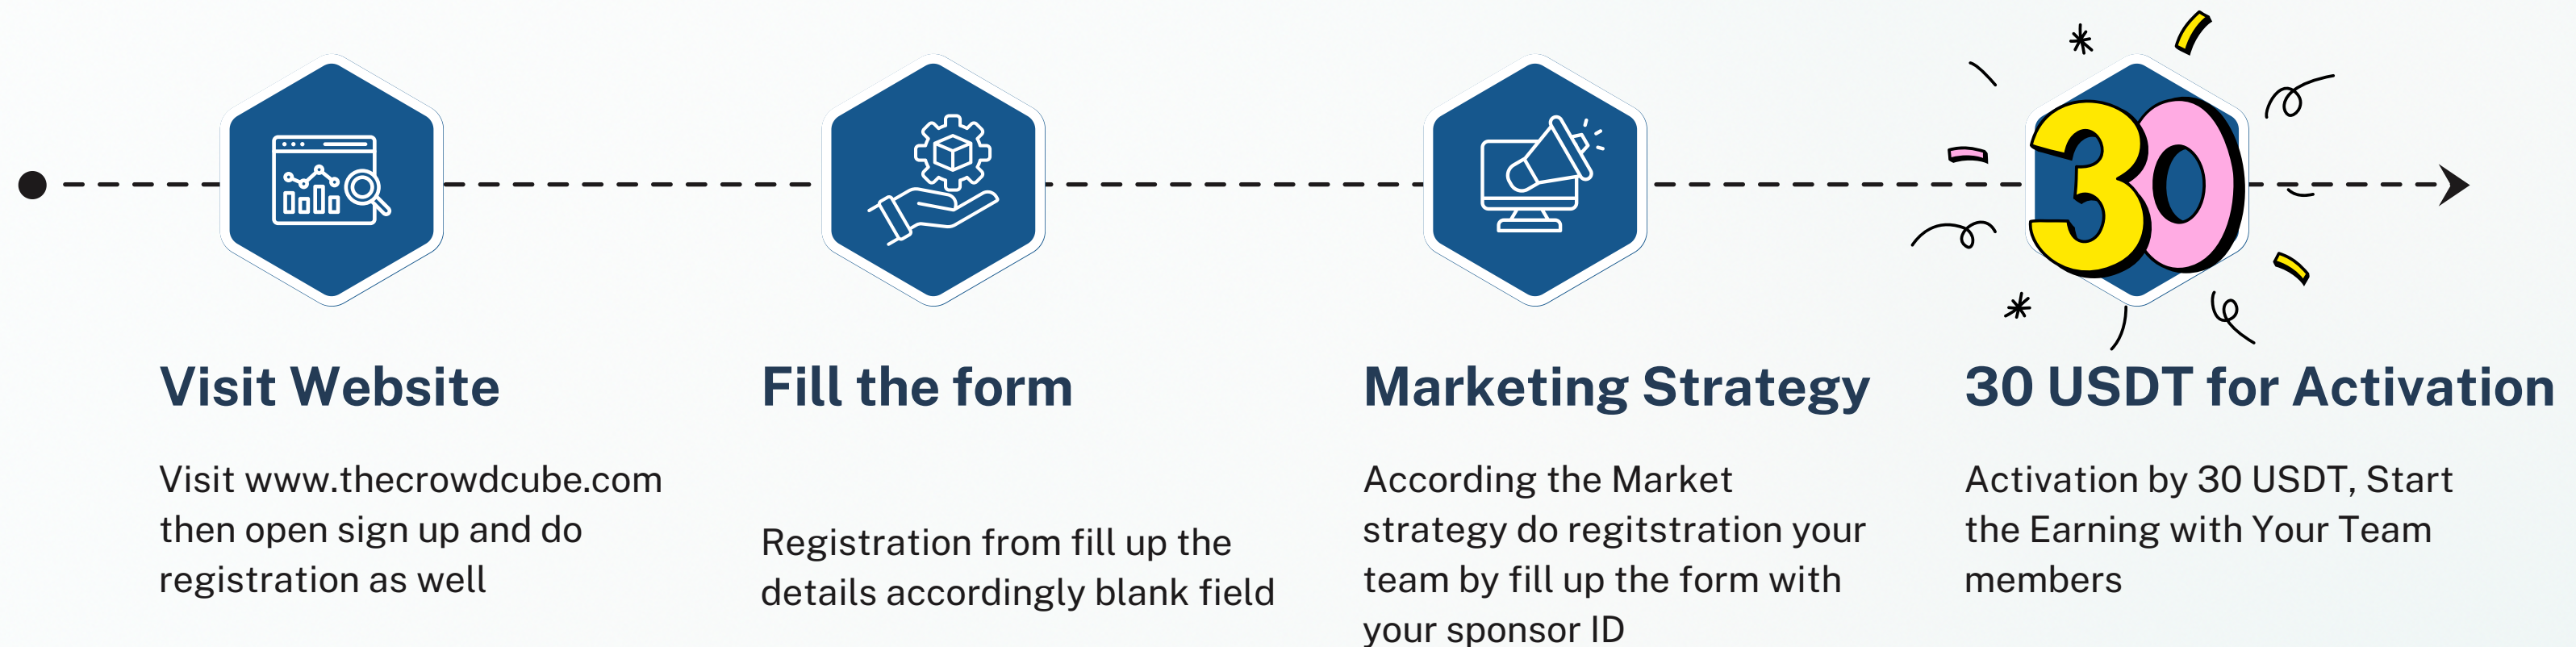

## Core Value

In summary, Crowdcube empowers entrepreneurs by providing them with a platform to secure funding while enabling individuals to support and profit from the growth of promising businesses.
